

Seemab Yamin

Python Engineer

(92) 316-0898250 | Pakistan | seemab.y1@gmail.com | <https://github.com/seemab-yamin/>

Summary

I am a result-driven Python Engineer with hands-on experience in designing and developing scalable **ETL** pipelines, web scraping infrastructure, and data solutions using **Python, SQL, AWS, and Git**. Exemplified excellent problem-solving and communication skills working in **Agile teams** to produce streamlined data workflows, including the incorporation of **Gen AI** technologies such as **ChatGPT, Gemini, etc**, for intelligent automation. Well-documented history of deploying cloud-based solutions, streamlining data processes, and effective collaboration across teams to deliver innovation and reliability.

Education

COMSATS University of Islamabad

Attock, Pakistan

Bachelor's Degree in Computer Science

September 2018 - August 2022

Work Experience

Luxevision Consulting LLC | Data Engineer | November 2024 - May 2025

- I had worked in Agile teams to manage Apache Airflow pipelines (Python) to integrate and automate data processing ETL pipelines.
- I was continuously monitoring pipeline performance for data integrity and reliability.
- I had performed integration of S3 with the Open Metadata platform and managed data processing ETL jobs in Matillion.

Codeaza Technologies | Web Scraping And Automation Engineer | September 2022 - June 2024

- I have successfully maintained robust core Python ETL pipelines and deployed solutions using AWS cloud services.
- My work includes data remodeling, building and managing data warehouses, and ensuring high-quality, reliable web scraping and efficient web crawling.
- I've developed and maintained bots, implemented and supported software deployments, and handled data validation and cleaning.
- I've integrated various databases and led agile teams to deliver efficient and scalable data solutions.
- I had implemented an LLM-based smart data solution using the ChatGPT API.

6th Sense Technologies | Junior Python Developer | January 2022 - January 2023

- I have designed and built APIs to support scalable applications, maintained web scrapers for consistent data extraction, deployed and managed servers, and developed web applications using Django to deliver reliable backend solutions.

AndroWeb IT Solutions | Web Development Intern | May 2021 - September 2021

- I have developed basic websites using HTML, CSS, and JavaScript, creating clean and responsive user interfaces to meet foundational web development needs.

Professional Skills

Frontend: HTML5, CSS3, Bootstrap

Backend: Python, FASTAPI, Flask, REST API, Django, Django DRF

Cloud/DevOps: AWS, Docker, Linux Servers

Database: MySQL, PostgreSQL, MongoDB, Elastic Search

Architecture & Design: Microservices, Serverless functions, Event Driven Architecture, Data Engineering

Testing & QA: Selenium, Playwright, Postman

Tools & Collaboration: Slack, Jira, Confluence, Git, Github, Gitlab, Agile, Trello, Clickup, Basecamp, Notion, Airtable
